

JUNGLE ESCAPE

JUNGLE ESCAPE

Jungle Escape is a fun and highly effective hands-on game that's perfect for introducing and reinforcing basic team skills.

The adventure begins when teams learn that their airplane has crash-landed in a remote jungle. To survive, each group must build an escape helicopter using spare parts, a diagram, and limited access to a completed model.

Learning Outcomes

- Discover how teams function: Fragmented, Divergent, or Cohesive
- Learn the group-process skills vital to effective teamwork, including communication, decision making, problem solving, and conflict resolution
- Experience first-hand the impact of planning on group results
- Understand the effect of individual behavior on group productivity

Applications

- Kick off a team-building workshop or seminar
- Introduce or reinforce basic team-building skills
- Surface group issues or concerns that block team progress

JUNGLE ESCAPE

How It Works

This exciting simulation challenges participants to work together to complete a project under a deadline and with limited information.

Presented with a predetermined set of toy parts, teams must create a plan for construction and then build a helicopter to exact specifications. After the models are completed (approximately 30 minutes later), team members take part in a discussion about team dynamics and offer insights gained from the activity. When scores are compared, participants learn that typically the team that took the most time to plan builds the helicopter in the least amount of time.

Facilitator's kit: \$395 (for 3 groups)

Participant's booklets: \$30 for a 5-pack

Extra game pack for 1 group: \$95
